Abdulhamid Sonaike

FULL-STACK DEVELOPER

SUMMARY

I am a highly experienced full-stack developer with a proven track record of developing responsive and innovative web applications for enterprise organizations. With over 2 years of expertise in frontend development, I have built the best user interfaces utilizing HTML5, CSS3, React, React Native, and other JavaScript libraries. I also possess capabilities to develop server-side code using NodeJS & Django to take care of data management tasks and other business logic developments. My objective is to use my extensive skillset, experience, and abilities to enhance performance improvement by delivering superior results. In the past few years, I have been successful in designing open source websites gaining trust from numerous customers.
